the whole scheme in a very short time. The Main Headings undergo a constant, but slow, modification. Sometimes the presence or growth of an unusually large block of material, such as now exists in CIR (Circus), merits its being removed from its former position as a sub-heading of ENT (Entertainment). With certain obvious modifications, this list does service for both Historical and Modern Sections, the relevant H or M being prefixed on the rubber 'grid' stamps described before. It will be noticed in the list below that there are certain general headings which appear vague, such as IND (Industry & Occupations). This is a left-over and miscellaneous heading into which material uncatered for in the Main Headings is put, pending the growth of any particular subject to a size or status when it earns its own Main Heading.
